## After Transparency, <br> How to Define <br> Responsible Pricing?

Chuck Waterfield CEO
MicroFinance Transparency December 2013

## Sign in a pub in Frankfurt Germany

## Do we really have nontransparent pricing in microfinance?

Here's an example of what a client faces in shopping for a loan

## Which loan would you pick?

|  | Zero Interest <br> Loan | Interest and <br> Fees | And Savings | Interest <br> Only |
| :--- | :---: | :---: | :---: | :---: |
| Loan amount: | $\$ 1,000$ | $\$ 1,000$ | $\$ 1,000$ | $\$ 1,000$ |
| Loan term: | 10 weeks | 10 weeks | 10 weeks | 10 weeks |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |

## Price curve follows cost curve

## Price curve follows cost curve

## A new way to look at the data

1. Is an MFI close to the curve in its country for costs? For portfolio yield?
2. If not, why not?
3. What spread has the MFI selected between its costs and the price it has chosen?

## The MFT Website has a wealth of

## information

## Opaque

## Transparent

## Responsible

- Transparent Prices
- Now we know more about what prices we are charging
- We know more about why we charge those prices
- Responsible Prices
- Now we are moving forward to discussion of what prices we should charge (to support the ideals and values of the microfinance industry)
- This is arguably the difficult part, the subjective part
- Should we do it?
- How would we do it?

## Defining a Responsible Price

## Defining a Responsible Price

## MFI's Costs

 $\checkmark$
## + MFI's Choice of Profit

## Defining a Responsible Price

Step 3: Factors influencing client ability to pay

## Institution and Client Perspectives

## Institution

## Client

"Responsible" Price
"Fair" Price

## Institution and Client Perspectives

## Institution

"Responsible" Price

Global? Productlevel? Client Level?

## Client

"Fair" Price

Price of the his/her loan

## Institution and Client Perspectives

## Institution

Global? Product-level? Client Level?

Bias to consider only MFI's income

## Institution and Client Perspectives

## Institution

## Client

"Responsible" Price

Global? Product-level? Client Level?

Price of the his/her loan

Bias to consider only MFI's income

Possible to treat each client fairly?

"Fair" Price

Must consider cost from client perspective

If client makes informed decision, is it "fair"?

# Pricing for Sustainability 

Pricing for Profits

## A Deeper Discussion of Profitability

## The Institution

- Must the institution be profitable?

## A Deeper Discussion of Profitability

## The Institution

- Must the institution be profitable?

## Each loan product

- Must each product be profitable?
- Fair for the rich to subsidize the poor?
- Fair for the poor to subsidize the rich?

## A Deeper Discussion of Profitability

## The Institution

- Must the institution be profitable?

## Each loan product

- Must each product be profitable?
- Fair for the rich to subsidize the poor?
- Fair for the poor to subsidize the rich?

## Each client within a loan product

- Must each individual loan be profitable?
- Fair for some clients to subsidize others?

## The Level of Profit is the Choice of

## Management

## What do YOU think?

If your MFI is new, and your costs are therefore high, is it fair to set a high price and hide it from your clients?

## What do YOU think?

Is it fair to make profits from your $\$ 2000$ loans to subsidize your \$200 loans?

## What do YOU think?

If the market is competitive for $\$ 2000$ loans, is it fair to make high profits from $\$ 200$ loans to subsidize the \$2000 loans?

## What do YOU think?

What is the maximum profitability (ROA) that is fair for \$5000 loans?
A) $2 \%$
B) $5 \%$
C) $10 \%$
D) $20 \%$
E) no limit

## What do YOU think?

What is the maximum profitability (ROA) that is fair for \$200 loans?
A) $2 \%$
B) $5 \%$
C) $10 \%$
D) $20 \%$
E) no limit

## Data Quality Score Factors: (Example)

30\% - Analyst Experience Level calculated based on time doing these, number of data points submitted, "thumbs up" eamed from others

20\% - Depth of analysis - we have a "quick shotgun approach (0 points)", a "validated shotgun approach (10 points)" and a "thorough pricing approach (20 points)"

30\% - cross-checks from other members - if the data submission is building on a previous data submission, it has a higher weight than a first-time data submission

20\% - age of data - As data becomes older, it drops in reliability
